BUILDING A MODULAR WORLD WITH SUPERIOR CONCRETE SYSTEMS

Superior's modular building systems use interlocking panels and posts made of high-performance fiber and steel-reinforced pre-colored concrete. Through tongue and groove construction, Superior's modular systems create a unique balance between strength, beauty, ease of construction, and reliability.

New Tech is one of America's leading precast concrete fence and mold manufacturers. We license our proprietary systems to entrepreneurs and organizations who want to build using more cost-effective, beautiful, and durable products in their countries.

Enclosures around government buildings and facilities

Homes and buildings utilizing Superior Concrete Products

Enclosures around utility and electrical substations

Around residential homes and developments
State of the Art Molding System

- Engineered molds for long-term durability
- Designed for ease of manufacturing and space savings
- Consistent coverage of form-release agent
- Rapid clean-up and maintenance
- Panels that consistently meet desired specifications
- Engineered components between finished posts, panels, and caps
- Panels resist weather, vibration, noise, and deterioration
- Professionally engineered, manufactured, and supported by Superior Concrete Products

Benefits of Superior Technologies

**Versatility** – Can be modified for a range of heights, wind loads, and soil conditions.

**Reliability** – High-strength, high-performance concrete (5,000 psi @ 28 days).

**Durability** – Engineered to last!

Wide Range of Building Applications

- Sound walls
- Fencing
- Enclosures
- Storage buildings
- Municipal buildings
- Industrial storage
- Classrooms
- Barns
- Offices
- Garages
- Recreational cabins
- Residential housing
- General utility and equipment

Backed by Superior Concrete Products

- Pioneers in precast concrete
- Made in the U.S.A.
- Complete molding, manufacturing, installation, marketing, and customer support
- Certified by the National Precast Concrete Association
- Member of American Fence Association

Technology Transfer Available to International Markets

- Licensing to manufacture and market Superior Building Systems outside the U.S.A.
- All production equipment and molds plus equipment recommendations
- Standard operating procedures for start-up, manufacturing, installation, and engineering
- Concrete mix design options
- Assistance with production line start-up, operations, and consulting.
